ABOUT

This shopping website is a gadget shop where anyone can add the items to their cart by clicking on the quantity. They can even like the products. The quantity that can be added is infinite. It contains 3 items at present: iPhone 12, MacBook Pro and Air pods.

OBJECTIVE

It is a simple shopping website with the intention of application of web programming languages.

PROGRAMMING LANGUAGES USED

- HTML
- CSS
- JAVASCRIPT

SOURCES

CONCLUSION

This internship in Dlithe has taught me some of the important programming languages like HTML, CSS, JAVASCRIPT and JAVA. I was familiarized with both front-end and back-end web development. This project is a part of the internship.
